| Nature of activities | Period            | Entity  | Subject matter   |
|----------------------|-------------------|---|--|
| <b>4. Employment</b> | 05/1994 – current | <ul style="list-style-type: none"> <li>– Radboud university medical center, Nijmegen, The Netherlands</li> <li>– Non-profit organization</li> </ul>   | <p>Currently associate professor at the Department for Health Evidence. My research focuses on establishing the impact of cancer screening programmes, in particular screening for breast cancer. I have a special interest in observational research designs that can be used in this field of research. As a long-standing member of the National Evaluation Team for Breast Cancer Screening, I am also involved with the evaluation of the long-term benefits and harms of the Dutch nation-wide breast screening programme.</p>       |
|                      | 11/2007 – current | <ul style="list-style-type: none"> <li>– Dutch Expert Centre for Screening (LRCB), Nijmegen, The Netherlands</li> <li>– Non-profit organization.</li> </ul>                                 | <p>The Dutch Expert Centre for Screening (LRCB) aims to ensure and continuously improve the quality of screening. We want to ensure a high quality level of screening programmes and continuously improve the performance of the professionals involved and the necessary equipment. For this, we periodically monitor the medical content by medical audits and perform quality control measurements of the imaging systems.</p>  |
|                      | 06/1994 – 12/2004 | <ul style="list-style-type: none"> <li>– EUREF - European Reference Organisation for Quality Assured Breast Screening and Diagnostic Services</li> <li>– Non-profit organization</li> </ul> | <p>EUREF, the European Reference Organisation for Quality Assured Breast Screening and Diagnostic Services, is a pan European organisation, widely drawn from different Member States and is operated on a non-profit making basis. The goal of EUREF is to promote high quality mamma-care in Europe. EUREF commits itself to the development and dissemination of the European Guidelines, certification of breast services and mammography equipment, and training and will provide support and advice on such issues upon request.</p> |

| Nature of activities                                     | Period                                     | Entity   | Subject matter  |
|--|--|--|---|
| <b>5. Consultancy/Advisory</b>                           | 11/2007 – current                          | <ul style="list-style-type: none"> <li>– Member of working group ‘Communication and expertise enhancement’, Centre for Population Screening, National Institute for Health and the Environment (RIVM)</li> <li>– Public</li> </ul>   | The working group provides advice to the Centre for Population Screening, which manages and coordinates the national population screening programmes for cervical cancer, breast cancer and colorectal cancer. RIVM is also responsible for providing clear public information. They coordinate and direct population screening programmes on behalf of the Ministry of Health, Welfare and Sport (VWS).  |
| <b>6. Influence on definition of research priorities</b> |  |  |   |
| <b>7. Research grants and other funding</b>              | 11/2007 – current<br><br>05/1994 - current | <ul style="list-style-type: none"> <li>– Dutch Expert Centre for Screening (LRCB), Nijmegen, The Netherlands</li> <li>– Non-profit organization.</li> <br/> <li>– Radboud university medical center, Nijmegen, The Netherlands</li> <li>– Non-profit organization</li> </ul> | <p>Grants obtained for research conducted by LRCB aims to improve the quality, safety, efficiency, and effectiveness of screening programmes. Innovative screening strategies should help optimize the screening programme by maximising the effectiveness of screening while minimising its harms. Information from LRCB’s research helps the target population make more informed decisions on participation in screening.</p> <p>Grants obtained for research conducted by Dr Broeders at the Department for Health Evidence focus on the evaluation of the long-term benefits and harms of screening for breast cancer. In particular, she aims to study whether moving from the current 'one-size-fits-all' screening policies to more individualised screening approaches can help optimise the efficacy of breast cancer screening, by maximising its life-sparing effect and minimising side effects.</p> |
| <b>8. Principal investigator or investigator</b>         |  |  | Principal investigator of the PRISMA study (Personalised RiSk-based MAMmography screening)  |
| <b>9. Intellectual property rights (IPR)</b>             | MM/YYYY –<br>MM/YYYY                       |  |   |

| Nature of activities                       | Period               | Entity  | Subject matter                         |
